PROJECTS

Crabfit Summer 2023
- An AI fitness trainer that takes in user information, and provides a personalized workout/diet program to help the user reach their goals.
- Uses OpenAI API to receive the data and generate the most efficient plan, tailored to each user.

JamZ Sept. 2023
- A legal document simplifier. Prompts the user to input any legal document (contracts, terms, leases), and the site outputs and summarizes the most important information, easier for the user to read.
- Uses OpenAI API to determine the most important and relevant information in each document

KTP Website August 2023
- Developed the website for the Kappa Theta Pi fraternity, showcasing all of our information, members, events, etc.
